Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Heidt et al. (USP 5,895,628) or Goldbecker et al. (USP 5,601,650).

Heidt et al. teach an apparatus(1) for treating/staining cytological or histological specimens on a slide. Treatment stations(6a-j) receive the treatment solutions and are covered by covers(7c-j). Specimen holder baskets(13a,13b) move the sample in an X-Y orientation. The claimed X-Y stage has been read on the taught holder basket(13a,13b). The claimed receptacles have been read on the taught treatment stations. The contamination shielding panel has been read on the taught covers(7a-j) .

Goldbecker et al. teach an apparatus for staining specimens on slides that are automatically moved to the appropriate reagent/ stain. The apparatus moves the slides in an X-Y orientation to the appropriate processing station(16) location. There are a plurality of stations(16) as seen in figure 1. Column 3 lines 44+ teach covering the transport route beneath the slide to prevent contamination of other slides and reagents. The claimed "X-Y stage" has been read on the taught means for moving the slides. The claimed "first and second receptacles" have been read on the taught processing stations(16). The claimed "contamination shielding panel" has been read on the taught covering.

Response to Arguments

Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.
